

AIRP-130

Air purifier is an air purification equipment with advanced level, widely used in hospital, small clinic, laboratory, office, meeting room and home etc. It can protect your life and your health through purifying dust, germ and virus, etc in the air.

AIRP-130, Air Purifier

Features:

- Wide application: It can be used in hospitals, small clinics, laboratories, offices, meeting rooms, family place etc.
- Air speed adjustable function: four kinds of air speed can be realized.
- High efficiency filter: HEPA filter, it can achieve clean air goals.
- Infrared remote control function: long-distance remote control switch machines, easy control.
- Adopt the advanced wind-driven system with a special outlet design, the noise<60dB.
- Timing function: It can be achieved 1h, 2h, 4h of timing function, reduce energy consumption.

Model	AIRP-130
External Size (LxWxH)	255x320x450mm
HEPA Filter	1
Filter Performance	99.999%@0.3um
Purify Air Volume	130m³/h
Power Consumption	40W
Noise	<60dB
Power Resource	110~240V/50HZ/60HZ
Cleanliness at Outlet	Class 100

AIRP-210

AIRP-210, Air Purifier

Air purifier is an air purification equipment with advanced level, widely used in hospital, small clinic, laboratory, office, meeting room and home etc. It can protect your life and your health through purifying dust, germ and virus, etc in the air.

Features:
